Workshop & Competition

We are proud to partner up with **AWS** to host a **DeepRacer Workshop & Competition** at our **Bloomington** studio on **Tuesday, June 20, 2023**. This event is open to any of our organization employees and partners to participate. **AWS DeepRacer** is the fastest way to get anyone rolling on their machine learning journey.

Developers of all skill levels, including those with *no prior machine learning experience*, can benefit from participating in this event by completing hands-on training to build a reinforcement model to race for thrill of competition and of course...**prizes**.

Lunch provided. Pre-registration and a **mandatory** online workshop webinar (*held in advance of the event*) required in order to bring a prepared model to the event, ready to race.
