

THE HALLOWEEN FLOWER

If Halloween had a flower, what would it be? What special features would it possess? How would it look? What would its name be? Today, you will decide.

Complete the following tasks:

- Design and color your Halloween Flower in the box below.
- Create both a common and scientific name (Latin) for the flower. It's scientific name should be 2 parts (Genus, Species). Figure out what you want to name it and look up it's Latin equivalent.
- Describe 3-5 special features of your flower. (Does it produce a toxin? Does it have interesting shaped flowers? Does it have special uses?)
- Identify the flower as either complete or incomplete. (Make sure your pic demonstrates your answer).
- Provide a description of how it is pollinated and spreads its seeds.

| Flower Information | Flower Picture and Name |
|-----------------------------------|-------------------------|
| Special Flower Features/Facts: | |
| 1. | |
| 2. | |
| 3. | |
| 4. | |
| 5. | |
| Complete or incomplete flower? | |
| Flower Pollination/Seed Dispersal | |
